The entire south side of the unit block of E. Hamburg St. (except for 3-7 E. Hamburg St., west of Patapsco St.) is improved with groups of two and a half story, late Federal style brick houses built in the late 1830's and early 1840's by John S. Gittings and several other local carpenters to whom he sold lots. 3-7 E. Hamburg St. are two story, two bay wide gable-roofed brick houses built in the 1850's for working class tenants. They are quite similar to other two story houses lining Patapsco St. just to the south of these houses. A number of houses on this side of Hamburg St. are currently being renovated.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This two story, two bay brick house with gable roof and dormer window was built in the 1840's and formed part of a group of such houses extending along this side of Hamburg St. This house, however, is notably taller than the neighboring two and a half story houses built more or less contemporaneously.

The house is two and a half stories in height, 16' wide, and occupies a lot 73' deep. The house is two rooms deep and there is a two story high, one bay wide and deep stair hall extension which connects the main house to a two story high, two bay deep rear addition, followed by a one story high, one bay deep addition. The house is constructed in running bond. The steeply pitched gable roof has a two-tier brick cornice and a single front dormer window. There is a double rectangular chimney located along both the front and rear roof gables on the east side of the house.

The first floor door and window openings have segmentally arched brick lintels with solid wood tympanums; the second story windows have no lintels. All of the sills are wood. The first floor window openings are filled with new 6/6 sash; the second floor window openings are filled with 1/1 sash. There is a modern flush door set beneath a single light transom which has been covered with siding. The house sits on a high basement, the entrance being reached by four stone steps. A rectangular basement opening is located to the left of the steps.
